Title: ANNULOPLASTY BAND AND METHOD

RESPONSE TO RESTRICTION REQUIREMENT

Sir/Madam:

In response to the Restriction Requirement mailed December 16, 2002, Applicant hereby elects the invention of Group I (claims 1-16 and 30-33) with partial traverse for the reasons provided below. In particular, it is respectfully believed that a restriction between Group I and Group II (identified by the Examiner as including claims 17-20) is improper. Independent claim 17 relates to a method of implanting an annuloplasty band for repair of an atrio-ventricular valve having a valve annulus and includes providing an annuloplasty band including a sheath and a stiffening element extending from a first end to a second end, with each end forming an eyelet adapted to receive a suture. This is same as the annuloplasty band limitations of claim 1 (of Group I). Further, the distinction set forth in paragraph 5 of the Office Action (i.e., "The process as claimed could be used with materially different products such as heart valves delivered by a catheter wherein the size is determined by non-invasive tools such as x-ray.") is unrelated to the annuloplasty band recited in claim 1. Therefore, it is respectfully submitted that a restriction between the inventions of Group I and Group II is improper, such that claims 1-20 and 30-33 should be examined.

With respect to the species identified by the Examiner in paragraph 7 of the Office Action, Applicant elects the asserted species of FIG. 1, and contends that all claims of the elected invention (including claims 1-20 and 30-33) are generic to the embodiments of FIG. 1 and FIG. 25. To this end, it is noted that the stiffening element 42 is the same in both FIGS. 1 and 25.
